

September 1, 2017

Dear Valued Customer:

Hurricane Harvey made landfall in south Texas on August 25, 2017 and has caused unprecedented flooding in the Houston and the surrounding areas. The US Government issued a Major Disaster Declaration for this region on August 27, 2017. This storm and flooding is causing severe supply, logistics, and operational issues for the Refining and Petrochemical industry as well as the downstream companies supported by this infrastructure.

We believe the impact of this natural disaster will likely affect the supply of raw materials from this region for some time as the supply chains for many of our upstream suppliers will severely tighten moving forward.

We appreciate your patience during this difficult period and will keep you informed of changes in this situation as it progresses.

Join us in keeping all those affected by this natural disaster in our hearts and prayers.

Sincerely,

Royal Adhesives & Sealants, LLC
